

HANNA RUBBER COMPANY

Specification Sheet

Neoprene Diaphragm Sheet

With a 14.5 oz. Nylon insert, Diaphragm Inserted Neoprene has better tear resistance than any other cloth-inserted rubber. Used for applications requiring extreme fabric strength while still maintaining Neoprene's excellent ozone and weather resistant properties.

Features:

- Plate finish
- **Insertion:** Nylon 14.5 oz. per sq./yd.
- Mullen burst test rating over 1000 psi with 1" square opening
- For applications requiring more fabric strength than Neoprene CI
- Made to RMA's specifications
- **Duro:** 60
- **Tensile:** 1000 psi
- **Elongation:** 350%
- **Temperature:** -20 to 170 °F
- **Color:** Black
