

HANNA RUBBER COMPANY

Specification Sheet

Rubatex R-27710

R-27710 is a high quality fast drying, quick setting, brushable neoprene contact adhesive that has been designed to produce a strong permanent bond when used with a variety of porous and nonporous substrates.

R-27710 is a high heat resistant product that gives excellent for bonding PVC/ NBR products together. It is also great for butt splicing buns into 50° rolls.

The product is used as a contact adhesive. After application to both substrates, the adhesive is dried until tacky to the touch but does not transfer to the finger. The substrates are then matched and sufficient pressure is applied to make a satisfactory bond.

R-27710 is flammable and as such bears a red caution label. Quarts 9 per case. Gallons 4 per case. 5 Gallon Pail.

Typical Properties

Color: Tan

Base: Neoprene Rubber

Solvent: Aromatic/Ketone/aliphatic blend

Viscosity: 800cps +/- 100

Solids: 24% +/- 2%

Wt./gallon: 6.9

Shelf Life: 12 months in original sealed container and stored at normal room temperature.
