

HANNA RUBBER COMPANY

Specification Sheet

Rubatex R-373

R-373 is a high quality fast drying, quick setting, brushable neoprene contact adhesive that has been designed to produce a strong permanent bond when used with a variety of porous and nonporous substrates.

R-373 is a high heat resistant product that gives excellent adhesion to rubber, foam, metal, wood, particle board, decorative laminates polystyrene bead board and many other substrates.

The product is used as a contact adhesive. After application to both substrates, the adhesive is dried until tacky to the touch but does not transfer to the finger. The substrates are then matched and sufficient pressure is applied to make a satisfactory bond.

R-373 is flammable and as such bears a red caution label. Quarts only, 9 per case.

Typical Properties

Color: Tan

Base: Neoprene Rubber

Solvent: Aromatic/Ketone/aliphatic blend

Viscosity: 500cps

Solids: 18%

Wt./gallon: 6.70

Shelf Life: 12 months in original sealed container and stored at normal room temperature.
