

# PRECISION GASKETS FOR DATA CENTER COOLING

## Custom Sealing Solutions You Can Count On

A SINGER INDUSTRIAL COMPANY

When you're managing a high-density data-center, uptime isn't just a metric – it's a mandate. Every element in the cooling loop plays a role in maintaining performance and reliability, right down to the gaskets and seals that keep your system leak-free.

At Hanna Rubber, we understand that precision and consistency matter at every joint, every interface, and every component. That's why we bring over a century of industrial sealing expertise to deliver gasket solutions designed specifically for demanding data-center environments.

### Hanna Rubber

908 West 25th Street

### Why Hanna Rubber?

- **200 Years of Combined Experience**
- **Large & Diverse Inventory**
- **State-of-the-art Fabrication Equipment**
- **ISO Certification**
- **High-Value Solutions at Competitive Prices**

# CUSTOM GASKETS FOR DATA CENTERS

Your cooling system is only as reliable as its smallest components – and that’s where Hanna Rubber delivers measurable value.

Our gasket solutions are purpose-built to withstand thermal cycling, vibration, and exposure to coolant media, ensuring consistent performance even under continuous 24/7 operation. With deep material expertise and responsive production capabilities, we help you protect uptime, efficiency, and peace of mind.

## Precision Fabrication for Mission-Critical Performance

- Built to meet tight tolerances and accelerated production timelines.
- Custom gaskets cut to exact dimensions using Waterjet, Atom/CNC, and die/knife technologies.
- From one-off prototypes to full production runs, we deliver precision, consistency, and reliability that keep your projects on schedule.

## Advanced Materials for Cooling System Integrity

- Engineered with PC70EP peroxide-cured EPDM, rated from  $-67^{\circ}\text{F}$  to  $+275^{\circ}\text{F}$ .
- Optimized for liquid-cooling and coolant-loop applications, resisting glycol mixtures, dielectric fluids, and high-purity chemistries.
- Maintains long-term sealing integrity under pressure, vibration, and thermal cycling – protecting your data-center uptime and cooling efficiency.

## Why Hanna Rubber?

At Hanna Rubber, we combine decades of sealing expertise with advanced fabrication capabilities to deliver gasket solutions that keep your data-center cooling systems running reliably and efficiently.

- ✓ **Single-source reliability** – Seals, hoses, fittings, and extrusions from one trusted partner.
- ✓ **Proven expertise** – Over 100 years of industrial sealing experience.
- ✓ **Collaborative approach** – We partner with engineers to ensure the perfect fit and performance.
- ✓ **Comprehensive solutions** – From manifold gaskets to pump and chiller seals for any scale.
- ✓ **Commitment to uptime** – Engineered for leak-free, 24/7 reliability in critical operations.

## Contact Hanna Rubber Today

Contact our team today at (816) 221-9600 to discuss your application, share your drawings, or request a rapid quote. Let’s build the gasket solution that keeps your cooling system performing at its best – 24/7.
